|---------------------------|---|
| Item name | Common rail dummy controller kit |
| Bar code | 3700461498596 |
| Introduction | Checks the status of the high-pressure pump regulator. |
| Text | <p>This device is to be used in conjunction with the digital pressure tester and the high-pressure fuel kit.</p> <p>With this kit, you can bypass the pump regulator to measure pressure and diagnose any regulator or pump problems.</p> <p>After observing the low pump pressure, simply remove the original pressure regulator and select the correct dummy regulator to bypass and seal the port.</p> <p>If the pressure returns to normal, the regulator causes the loss of pressure. The regulator is therefore to blame.</p> <p>If the pressure remains too low, the pump is faulty.</p> <p>This test is recommended by manufacturers of high-pressure pumps.</p> <p>The kit includes 8 different dummies to seal all regulator ports.</p> |
| Warranty period | 2 years |
| Fuel type | Diesel |
| Tariff code | Tariff Normal (TN) |
| Warranty Procedure | EASY |
