

SMOKE LEAK DETECTOR

Reference : AC 0410

Item name SMOKE LEAK DETECTOR

EAN code 3700461400940

Text Thanks to its compact size, this machine is easily transportable, allowing intervention in the entire workshop.
Its integrated compressor eliminates the need for an air supply.
Compatible with the majority of the fleet, connected to the battery terminals, it allows quick diagnosis of the vehicle's closed circuits (turbo, exhaust, cooling, etc.).

To detect micro leaks on the circuits:

- vacuum
- exhaust
- turbo insulation
- oil pan
- admission
- cooling

This device considerably reduces leak detection time by diffusing an opaque, fine and instantly identifiable smoke on even the smallest leaks.
Without any risk for the user and the vehicle.

Product highlight Integrated compressor
Leak rate reading

Specifications Specifications:

- power supply: 12V
- output pressure: 1.2 bar for turbo system / 0.05 bar for exhaust system
- flow rate: 8L/min
- smoke control
- mode of operation: air only or smoke
- control manometer
- oil capacity: 50ml
- mineral oil (included)
- supplied with its accessories
- test fluid 250 ml = 35 hours of use
- weight: 6Kg
- dimensions: 260x210x230mm

Contents

Contents:

- main unit
- accessory case
- adapter cone
- power cable
- smoke distribution pipe
- funnel
- universal adjustable inlet pocket
- pocket replacement rubber
- test fluid (250 ml)
- oil filler cap adapter (for most BMW vehicles)
- smoke diffuser
- EVAP system accessory kit (fuel vapour recovery system)
- set of blanking plugs
