The 2 insulating layers are color-coded to allow visual inspection of the entire tool for proper use in an electrical environment, as recommended by UTE18-510 and IEC 60900. **WHEN THE ORANGE LAYER IS DAMAGED AND THE RED LAYER IS VISIBLE = DANGER.**

- The thickness of the insulating layers is determined by the weight of the tools to ensure optimum resistance.
- Tools are designed to withstand extreme temperatures from -20 to +70°C.
- Each tool is tested to 10,000V AC and approved to 1000V AC for use on low-voltage networks.
- Several checks at every stage of production, in addition to IEC 60900 standard checks.
