Free-standing bearing kit for aluminium hubs

Reference : OM 8035

Item name	Free-standing bearing kit for aluminium hubs
Bar code	3700461407611
Introduction	This kit has been specially designed for dismantling hubs and bearings on VAG multi-spoke axles. Suitable for double compact bearings where the hub and bearing must be removed first. No need to remove the stub axle!
Text	The steel bearing is usually extremely tightly packed into the Aluminum axle body, making disassembly considerably more difficult. When using an inertia hammer, there is a risk of damaging suspension parts. In addition, micro-cracks in the Aluminum body can lead to breakage. With this special tool, components can be carefully removed directly from the vehicle. Features : - bearing removal - free-standing and removal of hubs
Specifications	1/2 drawer format
Applications	Applications : - Audi: A4 (2000-), A5 (2007-), A6 (1997-), A7 (2010-), A8 (1994-), Q5 (2008-), R8 (2007-) - Seat Exeo (2008-) - VW Passat (2003-)
