Automatic wheel balancers 3D laser pointer + wheel lift

Reference : EQ 0021

Item name	Automatic wheel balancers 3D laser pointer + wheel lift
Bar code	3700461408274
Text	Motorized wheel balancers with large digital display. Automatic 3-parameter measurement for fast, simple and accurate balancing of LV, LCV and 4x4 wheels. Balancing can be performed in dynamic or static mode, with unbalance optimization and the hidden weight program available. A large number of programs will enable you to work on any type of rim, according to the user's needs and habits. It will also be possible to work with 2 operators at the same time for greater speed, and the long length of its shaft will enable it to cover even rims with very large offsets. For added comfort, the wheel balancers feature an electromagnetic brake that stops the wheel at the precise point to be balanced in ALS programs. A precision laser and light are also automatically activated for ultra-precise bonding, with no risk of residuals or wasted lead. Semi-automatic wheel lift. Makes it easy to position the wheel on the balancing shaft. The operator can effortlessly position the wheel to be balanced, thanks to the universal pneumatic assistant (compatible with all wheel balancers). Reduced footprint, and pressure adjustment via regulator.
Warranty period	2 years
Tariff code	Tariff Equipment (TE)
Composition of nomenclature	1 x EQ 2100 - Automatic wheel balancers 3d digital display + laser pointer 1 x EQ 0100 - Semi-automatic wheel lifter for balancers

Warranty Procedure NO

2 WARRANTY TE
