<b>Introduction</b>	Specially designed for the rapid repair of micro-leaks in automotive air-conditioning systems.
<b>Text</b>	The stop leak introduced into the system will begin to circulate to the leak hole with the refrigerant gas. As it exits, the product reacts with the air, hardening and permanently sealing the micro-leak. This concentrated version allows less substance to be introduced into the A/C system, while still achieving the same results as traditional stop-leaks. It can also be used for preventive actions. Compatible with A/C systems using HFC R134a and HFO R1234yf.
