

ELECTRICAL SENSORS AND ACTUATORS TESTER

Reference : AC 0900

Item name	ELECTRICAL SENSORS AND ACTUATORS TESTER
Bar code	3701555307510
Introduction	<p>Don't worry about troubleshooting! This diagnostic tool will enable you to test and activate every vehicle component and sensor, while checking that they are working properly.</p>
Text	<p>This device enables you to check the operation of each Engine sensor and/or activate a component in actuator mode (injectors: gasoline - diesel common rail - LPG, motor-fan, EGR valve, throttle body, glow plug, ignition coils...), while controlling the frequency by varying the pulse width modulation (PWM). This tester also has the ability to check the magnetic pulse of a sensor without dismantling it, a real time-saver. Last but not least, the tester's precise diagnostics make it easy to avoid having to replace a non-defective element.</p>
Product highlight	Automatic menu recognition by connecting the appropriate cable.
Warranty period	2 years
Voltage	12V
Tariff code	Tariff Normal (TN)
Warranty Procedure	DIAGNOSTIC
