Maintenance station for automatic gearbox

Reference : HU 8011

Item name	Maintenance station for automatic gearbox
Bar code	3701555310107
Introduction	The essential automatic equipment for 100% ATF oil replacement. The HU 8011 station guarantees precise, assisted preventive maintenance, effectively extending the life of automatic transmissions.
Text	This assisted maintenance station is a preventive maintenance tool. Its purpose is to extend the service life of automatic gearboxes, which are difficult to repair and very costly to replace. Unlike a traditional gravity-fed oil draining system, which removes 60% of the residue, this system has been specifically designed to clean the entire interior of the automatic gearbox. Fully automatic and easy to use: compatible with 12,000 vehicle models, 24 connectors, and a removable LCD screen to guide each step. Features: - 100% replacement of ATF - Internal flushing of the automatic gearbox - Internal flushing with additives - Internal flushing of the heat exchanger
Product highlight	Warning light, for working in hidden time
