

Maintenance station for automatic gearbox

Reference : HU 8011

Item name Maintenance station for automatic gearbox

Bar code 3701555310107

Introduction The essential automatic equipment for 100% ATF oil replacement. The HU 8011 station guarantees precise, assisted preventive maintenance, effectively extending the life of automatic transmissions.

Text This assisted maintenance station is a preventive tool. Its role is to extend the life of automatic gearboxes, which are difficult to repair and have a very heavy financial cost if they have to be replaced. The role of oil in an automatic gearbox is fundamental, and most problems can be avoided with appropriate preventive maintenance. Unlike a traditional gravity oil change, which will remove 60% of the residue, our team of specialists has specially designed this system to clean the entire interior of the automatic gearbox without disassembly. Simple to use, fully automatic, and thanks to its included technical data (12,000 models) and 24 fitting solutions compatible with the majority of vehicles on the market, it assists you every step of the way. You can easily monitor, update and control the machine via the included removable LCD tablet.

Features :

- 100% ATF oil replacement
- internal washing of automatic gearbox
- internal rinse with additives
- internal washing of heat exchanger

Product highlight Warning light, for working in hidden time

Contents

Contents :
