Oil pressure insert, ethanol and BP fuel

Reference : AC 0844

Item name	Oil pressure insert, ethanol and BP fuel
Bar code	3701555310213
Introduction	Using the 0-300bars pressure sensor, this kit enables you to test engine oil pressure via the pressure switch and/or turbo lubrication on most Engines. It can also be used to check the % of ethanol in the low-pressure petrol circuit.
Text	For oil pressure : Time-saving: in just a few minutes, if the oil pressure sensor is not accessible (e.g. located behind the alternator), you can quickly take the oil pressure directly from the turbo, in place of the original banjo connector. To check ethanol % : This test checks whether the fuel system contains ethanol. Due to the enormous price difference between E85 and regular petrol, vehicle owners tend to fill up with E85 in unsuitable vehicles, which leads to : - engine combustion problems - engine knocking - dashboard engine warning lights coming on - to impossible engine starting
Specifications	Specifications: - 10 adapters to fit most oil pressure sensors - 4 adapters to fit most Banjo turbo adapters - 1 90° quick connector
