Valve core pack 21,55x7,8mm (5pcs)

Reference : CO 4017

Item name	Valve core pack 21,55x7,8mm (5pcs)
Bar code	3700461483530
Introduction	Ensure perfect sealing of your air-conditioning circuits with the CO 4017 set. These high-precision shells are indispensable for the preventive or curative replacement of charge valves, guaranteeing the absence of slow leaks on high- and low-pressure systems.
Text	CO 4017 is not a standard consumable; it's a critical component calibrated for the demands of modern refrigeration circuits. Precision dimensions (21.55 x 7.8mm): specific dimensions guaranteeing perfect compatibility with standard automotive valve bodies. High-Performance seals: Elastomer seals are resistant to oils (PAG/POE) and refrigerants (R134a / R1234yf). They withstand extreme temperature cycles without cracking. Anti-corrosion materials: Alloy body resistant to chemical aggression and oxidation, ensuring easy disassembly even after many years of service. Batch packaging (5 pcs.): Ideal format for workshop stock, enabling immediate response to the need during an air-conditioning refill if the original valve core shows signs of fatigue or leakage. Dynamic sealing: Constantly-loaded internal spring for a clean, hermetic seal as soon as the couplings are removed from the charging station.

The CLAS advantage: Unlike generic valve cores, the CO 4017 respects manufacturers' tolerances, avoiding the micro-leaks that cause air-conditioning compressors to trip.

Warranty period No warranty (consumable)

Tariff code Tariff Normal (TN)

Warranty Procedure NO
