Valve core pack 20x7,0mm (5pcs)

Reference : CO 4018

Item name	Valve core pack 20x7,0mm (5pcs)
Bar code	3700461483547
Introduction	Secure your climate maintenance operations with the CO 4018 set. These precision shells (20 x 7.0mm) ensure a hermetic seal after each refill, eliminating the risk of residual leaks at service ports.
Text	CO 4018 is a strategic spare component for maintaining pressure integrity in LV and LCV air conditioning systems. Specific dimensions (20 x 7.0mm): precisely calibrated for perfect insertion into the corresponding valve bodies, avoiding any mechanical play that could lead to leaks. Multi-fluid sealing: seals designed to withstand R134a and R1234yf fluids, as well as PAG and POE lubricating oils. Thermal and chemical resistance: Materials selected to withstand high pressures and wide temperature ranges without degrading the elastomer seal. Safe replacement: high-reliability internal spring guarantees immediate return of the valve for tight closure as soon as the couplings are disconnected from the station. Optimized workshop stock: Batch of 5 pieces, the ideal size to compensate for defective or dirty valve cores observed during diagnostic phases.

Warranty period No warranty (consumable)

Tariff code Tariff Normal (TN)

Warranty Procedure NO

***Public price Exl. Tax : €10**

*Applicable user fees from 01/09/2026 to 31/08/2027
