Ultrasonic cleaner 57 L 1000W 40 kHz

Reference : OE 7202

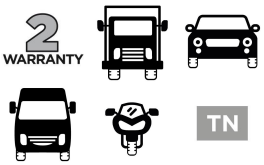

Item name	Ultrasonic cleaner 57 L 1000W 40 kHz
Bar code	3701555329406
Introduction	57-liter ultrasonic tank for intensive cleaning of large parts such as cylinder heads, engine blocks, injectors and transmission components. Its high power and advanced operating modes guarantee optimum results, even on heavily encrusted deposits.
Text	This ultrasonic cleaner is specifically designed to meet the needs of auto repair shops and engine refurbishing facilities. Its large tank (620 mm long) allows for easy immersion of a complete cylinder head, ensuring uniform cleaning even in internal passages (oil, water, intake). The 40 kHz frequency provides an excellent balance between cleaning power and surface protection, making it ideal for sensitive mechanical parts. The various modes (half-wave, full-wave) allow you to precisely adjust the cleaning process according to the level of contamination. The degassing function improves the bath's efficiency by removing dissolved air, while controlled heating up to 80°C optimizes the dissolution of grease, oil, and combustion residues.
Product highlight	Large capacity, suitable for bulky parts of mechanical engineering and workshop needs
Specifications	Specifications: - usable capacity: 57 liters - tank dimensions: L620 x W500 x H230 mm - unit dimensions: L650 x W530 x H335 mm - ultrasonic power: 840 W

- Heating power: 1000W
- Frequency: 40 kHz
- Adjustable temperature: 20 to 80°C
- Timer: 0 to 60 min
- Net weight: 21 kg

Features:
- High-intensity ultrasonic cleaning
- Degassing mode (optimal bath preparation)
- Half-wave mode (for fragile parts)
- Heating with automatic temperature control
- Programmable cycle

Contents	- ultrasonic cleaners - cleaning basket - stainless steel lid
Advice	Use a cleaning solution appropriate for the parts and the contaminants to be removed. Position the parts in the basket so that the liquid can circulate freely around the surfaces to be cleaned. Adjust the temperature according to the type of part and contaminant. The combination of heating and ultrasonic waves improves cleaning effectiveness on grease, oil, and stubborn deposits. Avoid overloading the basket and ensure that the areas to be cleaned are fully submerged. After use, perform regular oil draining and cleaning of the tank to maintain the unit’s performance.
Warranty period	2 years
Product weight (kg)	21 kg
Color	GREY
Capacity (ml)	57,000 ml
Capacity (l)	57 l
Tariff code	Tariff Normal (TN)
Warranty Procedure	DIAGNOSTIC
Customer benefit	Powerful cleaning of large and complex mechanical parts, even in hard-to-reach areas. 840 W of 40 kHz ultrasonic power combined with 1,000 W of heating to effectively remove grease, oil, deposits, and residue. Ideal for cylinder heads, engine parts, carburetors, and injectors.

***Public price Exl. Tax : €1,390**
