

## **Heavy-Duty HGV Brake Caliper Mount**

Reference : OH 8101

**Item name** Heavy-Duty HGV Brake Caliper Mount

**Bar code** 3701555330990

**Introduction** A stand specifically designed for installing and removing brake calipers on heavy-duty vehicles, facilitating work in any position (top, side, or bottom) while ensuring ergonomics, efficiency, and safety.

|                           |                                                                                                                                                                                                                          |
|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Text</b>               | Height-adjustable with a built-in, manually operated hydraulic cylinder. Excellent maneuverability in tight spaces thanks to four swivel casters (the rear ones have brakes).                                            |
| <b>Product highlight</b>  | Reduction in the time required for a single operator to work safely.                                                                                                                                                     |
| <b>Specifications</b>     | <p>Specifications:</p> <ul style="list-style-type: none"> <li>- Travel: 125 mm</li> <li>- 4 swivel casters, 2 of which have brakes</li> <li>- Dimensions: 650 x 350 x 1000 mm</li> <li>- Load capacity: 70 kg</li> </ul> |
| <b>Advice</b>             | For optimal performance, the recommended procedure (for example, when replacing a disc) is to use the OH 8020 hub/caliper support to remove the assembly.                                                                |
| <b>Warranty period</b>    | 2 years                                                                                                                                                                                                                  |
| <b>Vehicle type</b>       | HGV                                                                                                                                                                                                                      |
| <b>Length (mm)</b>        | 650 mm                                                                                                                                                                                                                   |
| <b>Width</b>              | 350 mm                                                                                                                                                                                                                   |
| <b>Tariff code</b>        | Tariff Normal (TN)                                                                                                                                                                                                       |
| <b>Warranty Procedure</b> | DIAGNOSTIC                                                                                                                                                                                                               |
| <b>Customer benefit</b>   | Compatible with buses, trucks, and all types of industrial vehicles thanks to its rotating system.                                                                                                                       |
