

METAL PRESSURE AND VACUUM PUMP (-1/+ 4bar)

Reference : HU 0550

Item name	METAL PRESSURE AND VACUUM PUMP (-1/+ 4bar)
Bar code	3700461415104
Introduction	The metal pressure/vacuum pump offers precise control of highly demanding pneumatic systems, ideal for advanced workshop diagnostics on turbos, injections and depressurized controls.
Text	Made entirely of metal, the HU 0550 pump delivers a wide pressure and vacuum range (-1 to +4 bar) to meet the most demanding tests. Designed for high-tech applications, it enables precise control of : <ul style="list-style-type: none">- Turbo boost pressure- Fuel pressure regulator tightness- Vacuum advance curve- Relief valve- Injection pump LDA diaphragm- EGR valve- Brake booster diaphragm- Assist vacuum pump
Product highlight	Robust pro tool for high-precision diagnostics (-1/+4 bar)

Specifications	Specifications: - turbo boost pressure control - fuel pressure regulator tightness check - check vacuum advance curve - check relief valve - injection pump LDA diaphragm tightness check - check EGR valve - servo-brake diaphragm check - assistance vacuum pump check
Contents	SA8071: 360° rotating manometer SA8081: set of 8 nozzles
OEM codes	VAS6213
Warranty period	2 years
Tariff code	Tariff Normal (TN)
Warranty Procedure	EASY
Customer benefit	Faster advanced diagnostics thanks to a precise, durable and versatile metal pump, capable of controlling turbo, injection, EGR and depressurized systems with a 360° rotating manometer.
