13 block drain plugs kit

Reference : HU 2019

Item name	13 block drain plugs kit
Bar code	3700461415746
Text	These plugs eliminate the problem of tapping damaged oil sumps, fitting in place of the original plug without further intervention. The thread pitch is the same as the original, but with a larger thread diameter. The use of these drain plugs does not require rethreading; they can be fitted directly. Each plug consists of a second plug. After fitting, the first plug remains mounted on the oil sump, while the second plug is used for subsequent oil changes.
