2 pivoting engine support hooks

Reference : OH 0249

Item name	2 pivoting engine support hooks
Bar code	3700461461354
Introduction	This double-hook engine support cross-member keeps the engine in suspension when removing engine mounts or gearboxes. It's the essential safety tool for working under the vehicle while keeping the Engine perfectly aligned and stabilized.
Text	Designed to offer maximum stability without damaging the bodywork, this crossmember rests on the fender flaps thanks to its articulated feet fitted with rubber protectors. A system of two adjustable lifting hooks enables the load to be distributed precisely, and the holding height to be adjusted millimetre by millimetre by means of manual force screws. Its extendable length makes it compatible with the vast majority of passenger cars and light commercial vehicles. It's the ideal solution for clutch, timing belt or silentblock replacement operations, freeing up working space under the Engine.
Specifications	Specifications: - swivel legs - hook bracket with ball bearings - L: 1700 mm
OEM codes	MOT 1453
Warranty period	2 years
Width	1,700 mm
Maximum load (Kg)	500 kg

Tariff code Tariff Normal (TN)

Warranty Procedure DIAGNOSTIC

***Public price Exl. Tax : €199**

*Applicable user fees from 01/09/2026 to 31/08/2027
