SAE Male/Female Brake Hose Repair Kit

Reference : OM 8050BL

Item name	SAE Male/Female Brake Hose Repair Kit
Bar code	3700461469114
Introduction	Increase your reactivity and reduce your repair costs with the OM 8050BL, the complete solution for precision splicing of copper or steel brake pipes. A robust tool guaranteeing a perfect seal to SAE standards, essential for any brake maintenance workshop.
Text	The OM 8050BL has been designed to meet the specific needs of technicians faced with corroded or damaged brake hoses, enabling them to carry out original brake repairs directly on the vehicle or in the workshop. Multi-diameter capability: the kit covers the most common standard sizes found on the automotive market: Ø3/16" (4.75mm), 1/4", 5/16", 3/8", 7/16", 1/2" and 5/8". Double SAE recess: Allows the creation of male and female collars (single or double flare), ensuring total compatibility with brake fittings and hoses on the market. Secure clamping system: Grooved dies provide a firm hold on the hose, preventing any slippage during the compression phase for a perfectly symmetrical collar. Ergonomic, durable design High-strength materials: Presses and punches in heat-treated steel to withstand repeated pressure without deformation, even on steel pipes. Integrated pipe cutter: The set includes a pipe cutter (Ø3 to 30mm) with retractable

deburrer for clean cut preparation, a prerequisite for optimum sealing.

Compact "Easy-Work" format: thanks to its flat mounting, the tool can be stabilized in a vice (horizontally or vertically) for maximum working comfort when clamping.

Specifications SAE: male taper
DIN: female taper

Contents Contents:
- dies: Ø3/16" (4.75 mm)–5/8"–1/2"–7/16"–3/8"–5/16"–1/4"
- a tube cutter for Ø3 to Ø30 mm

Warranty period 2 years

Tariff code Tariff Normal (TN)

Product range B-Line

Warranty Procedure EASY
