Magnetic flexible pick up tool Ø5mm l.525mm

Reference : OM 8088

Item name	Magnetic flexible pick up tool Ø5mm l.525mm
Bar code	3700461462474
Introduction	This ultra-thin, magnetized flexible finger makes it easy to retrieve screws, bolts or small metal objects that have fallen into the most inaccessible areas of the Engine compartment. With a length of 525 mm and a magnetized head of just 5 mm, it's an invaluable ally for diagnostics and rapid troubleshooting.
Text	Indispensable for any mechanic, this magnetic finger slips in where no hand can go. Its flexible shaft retains the shape it is given, enabling it to bypass obstacles and reach the bottom of a crankcase, windshield bay or chassis. The magnet's power is calibrated to lift standard components, while remaining compact enough not to "stick" to metal walls during insertion. It's the tool that saves hours of dismantling covers for a single screw that's fallen out.
Warranty period	2 years
More	Magnetic
Cable length	525 m
Tariff code	Tariff Normal (TN)
Warranty Procedure	EASY
