

Power steering tester

Reference : AC 0310

Item name Power steering tester

Bar code 3700461450785

Introduction This tool enables power steering hydraulic pumps to be checked by direct pressure measurement, according to circuit flow and at high temperatures, thanks to the reinforced hose.

It is simply installed on the high-pressure outlet of the hydraulic pump (or on a pressure tap, depending on the manufacturer).

It's a universal device, thanks to its different diameter connections. The pressure gauge supplied is set at 140 bar and can withstand 120°C.

This enables the user to make a reliable diagnosis of a vehicle safety component.

Contents Contents :
- 0-140bar pressure gauge with isolation valve
- reinforced hose 0-120°C
- universal fittings for circuit/pump connections

Warranty period 2 years
