

Water pump flow tester

Reference : AC 1007

Item name Water pump flow tester

Bar code 3700461485671

Introduction In some cases of engine overheating, the water pump may be involved (broken shaft, worn fins...).

This tester enables you to check that water pumps are working properly, without dismantling them, thanks to the manometer which measures the water pump's flow rate.

Product highlight No need to dismantle the water pump
