

## Filling kit for nitrogen/hydrogen (N2-H2) leak detection 50bar

Reference : AC 1017

<b>Item name</b>	Filling kit for nitrogen/hydrogen (N2-H2) leak detection 50bar
<b>Bar code</b>	3700461483004
<b>Introduction</b>	The tools contained in the case are used to "pressurize" refrigeration and air-conditioning systems in order to "simulate" the pressure at which the system will then have to operate.
<b>Text</b>	By pressurizing the system with technical hydrogenated nitrogen (at an appropriate pressure, which differs depending on the refrigerant, as indicated by the sectors visible on the pressure gauge), the installer can be sure that, in the event of leaks due to poorly-made clamps, "cold" welds or manufacturing faults, these imperfections will be indicated by a loss of nitrogen detected by the pressure gauge provided. The system will then no longer encounter this type of problem.
<b>Product highlight</b>	Compatible with R134a and R1234yf gases
<b>Specifications</b>	Compatible with small and large bottles
<b>Contents</b>	Contents : <ul style="list-style-type: none"><li>- case</li><li>- SA4062: pressure regulator block with safety valve up to 50bar</li><li>- SA4060 : isolation pressure gauge + 12cm flexible hose</li><li>- SA4063: reducer for 1kg cylinder</li><li>- SA1090: 1kg hydrogenated nitrogen cylinder (N2-H2)</li><li>- SA4061 : 150cm piping</li><li>- SA4029: high-pressure fitting</li><li>- SA4052: high-pressure fitting for R1234yf gas</li></ul>

**Warranty period** 2 years

**Tariff code** Tarif Normal (TN)

**Warranty Procedure** EASY

**Consumable type** Additive
