Uv glasses

Reference : SA 1002

Item name	Uv glasses
Bar code	3700461430572
Introduction	Optimize your leak detection with SA 1002, the high-performance UV glasses designed to instantly reveal fluorescent tracers. Dual-action safety equipment that protects your eyes while making even the smallest air-conditioning or fluid leaks visible.
Text	The SA 1002 is much more than just a pair of goggles; it's an active optical filter that's indispensable for all thermal and Engine diagnostics using UV additives. Amber Contrast Filter: specially tinted to block stray light spectra and accentuate tracer fluorescence. They help pinpoint the origin of a leak, even under standard workshop lighting. UV400 protection: offer total protection against the ultraviolet radiation emitted by detection lamps, preventing eye fatigue and the risk of injury during prolonged use. Ergonomic design & comfort: Lightweight frame and adjustable temples for a perfect fit, even when working under the chassis or in uncomfortable positions. Diagnostic versatility: Can be used for all types of tracing: air conditioning circuits (R134a, R1234yf), cooling circuits, engine oil and gearbox. Workshop resistance: high-resistance polycarbonate lenses, treated against scratches and light splashes of chemical fluids.

The CLAS advantage: A critical diagnostic accessory often overlooked. Without them, the effectiveness of a UV lamp is reduced by 50%. SA 1002 guarantee "zero error" diagnosis from the very first pass.

Specifications EN 166 : 2001
EN 170 : 2003

Warranty period No warranty (consumable)

Tariff code Tariff Normal (TN)

Warranty Procedure NO

***Public price Exl. Tax : €14**

*Applicable user fees from 01/09/2026 to 31/08/2027
