

## KIT TO CONTROL CAMBERING AND DEFORMATION OF MOVING TRAINS

Reference : AC 2810

<b>Item name</b>	KIT TO CONTROL CAMBERING AND DEFORMATION OF MOVING TRAINS
<b>Bar code</b>	3700461480225
<b>Introduction</b>	<p>Deformation of any part of the running gear (curb impact, pothole, etc.) generally results in camber failure, causing poor roadholding, suspension stress and abnormal tire wear in the longer term.</p> <p>What's more, if the alignment is damaged, it will be very difficult to adjust the vehicle correctly.</p>
<b>Text</b>	<p>This control and diagnostic tool helps to identify the part responsible for the camber defect: a simple symmetrical check of the spacing between shock absorbers, stub axles and hubs will enable the operator to quickly identify a right/left difference (however small), thus saving time in diagnosis.</p>
<b>Product highlight</b>	<p>Used directly on the hub</p> <p>Quick control</p>
<b>Applications</b>	For front and rear axles
<b>Warranty period</b>	2 years
<b>Tariff code</b>	Tariff Normal (TN)
<b>Warranty Procedure</b>	EASY
