

CO2 detection kit

Reference : AC 3300

Item name CO2 detection kit

Bar code 3700461410413

Text

- 1- Replace the radiator or expansion tank cap with a Plexiglas tube containing a specified dose of tracer fluid (hot engine).
- 2- Place the bulb on the tube and squeeze repeatedly.
The gases in the cooling circuit mix with the tracer fluid.
The blue test liquid changes color (turns yellow) if there's an internal combustion leak and therefore the presence of CO2 gas in the coolant.
Problem: cylinder head gasket.

Specifications

- checks radiator for combustion gases.
- test fluid changes color if a leak is detected.
- quick identification of a faulty cylinder head gasket.

Warranty period 2 years

Capacity (ml) 250 ml

Capacity (l) 0.25 l

Tariff code Tariff Normal (TN)

Warranty Procedure EASY
