CO2 detection kit

Reference : AC 3300

Item name	CO2 detection kit
Bar code	3700461410413
Text	1- Replace the radiator or expansion tank cap with a Plexiglas tube containing a specified dose of tracer fluid (hot engine). 2- Place the bulb on the tube and squeeze repeatedly. The gases in the cooling circuit mix with the tracer fluid. The blue test liquid changes color (turns yellow) if there's an internal combustion leak and therefore the presence of CO2 gas in the coolant. Problem: cylinder head gasket.
Specifications	Specifications: - Allows you to check for the presence of exhaust gases in the radiator. - The test fluid changes color if a leak is detected. - Quickly identifies a defective cylinder head gasket.
Warranty period	2 years
Capacity (ml)	250 ml
Capacity (l)	0.25 l
Tariff code	Tariff Normal (TN)
Warranty Procedure	EASY
