FUEL/Turbo pressure control kit (-1/ + 9bar)

Reference : AC 4019

Item name	FUEL/Turbo pressure control kit (-1/ + 9bar)
Bar code	3700461410628
Introduction	CLAS has developed this versatile test kit specifically to diagnose low-pressure fuel supply circuits for gasoline and diesel engines, as well as turbo pressure and vacuum measurement for pneumatic solenoid valve control circuits.
Text	Including a fuel pressure connector kit and an air pressure connector, this set allows the use of a single pressure gauge to cover all pressure and vacuum controls between -1 and +9bar.
Product highlight	Certified pressure gauge
Contents	Contents: - a pressure gauge for positive and negative pressure (equipped with a quick-connect fitting) - a 3-meter hose for checking fuel pressure during a test drive - a 3-meter hose for checking tire pressure during a test drive - a T-fitting that can be connected to the low-pressure fuel line - a T-fitting (equipped with standard couplings) that can be connected to the low-pressure fuel line.
Warranty period	2 years
Tariff code	Tariff Normal (TN)
Warranty Procedure	DIAGNOSTIC

***Public price Exl. Tax : €449**
