

## DIESEL STARTING BLEEDING PNEUMATIC KIT

Reference : AC 4097

<b>Item name</b>	DIESEL STARTING BLEEDING PNEUMATIC KIT
<b>Bar code</b>	3700461487408
<b>Introduction</b>	<p>Modern diesel engines need to generate fuel pressures of over 2000bar to operate efficiently. The presence of air in the fuel system will affect engine operation.</p> <p>During fuel system maintenance and the installation of a new fuel filter, air will enter the system. Most modern systems have an automatic bleed or a hand pump permanently installed on the vehicle, but on many systems it takes some time to bleed all the air out of the system.</p> <p>Modern diesel engines use two main methods of fuel supply:</p> <ul style="list-style-type: none"><li>- pressurized feed: using an electric pump installed in the tank to deliver fuel to the high-pressure pump.</li><li>- vacuum supply: using a motor-driven suction pump to generate the vacuum that will drive the fuel to the high-pressure pump.</li></ul> <p>The tools in this kit are designed to be connected to diesel fuel circuits, using OEM-type fittings.</p>
<b>Product highlight</b>	Easy to re-prime, Ford compatible
<b>Warranty period</b>	No warranty (consumable)
<b>Fuel type</b>	Diesel
<b>Tariff code</b>	Tariff Normal (TN)

**Composition of  
nomenclature** 1 x [OP 0053BL - PNEUMATIC VACUUM BRAKE BLEEDER 1L](#)  
1 x [AC 4096 - DIESEL STARTING BLEEDING KIT](#)

**Warranty Procedure** NO

CLAS EQUIPEMENTS  
83, chemin de la CROUZA  
73800 CHIGNIN  
France
