

STROBE LIGHT

Reference : AC 5038

Item name STROBE LIGHT

Bar code 3700461485688

Introduction The strobe lamp is connected to a candle wire via an induction sensor. It produces a flash synchronized with the ignition point. This powerful flash, directed at the ignition marks engraved on the crankshaft pulley or flywheel, "freezes" the position of these marks in relation to the fixed index, making it easy to check whether the ignition advance setting is correct or not. The exact ignition point can therefore be set with great precision.

Text Please note that this lamp cannot be used to adjust the phase shift.

Specifications CAUTION: The exact parameters for setting the Engine's ignition timing can usually be found in the manufacturer's technical manual.

Warranty period 2 years

Fuel type Gasoline

Voltage 12V
