## HGV INDUCTION HEATER

OE 0900

This tool allows to heat a part in a precise place, thus facilitating the unlocking of screws, nuts, bolts, rods, hubs (even rusty), lambda probes, ball bearings... It also makes it easy to remove stickers, remove glued door sticks or HGV wheel nuts.

It is a real alternative to the torch or flame torch: its induction system allows to heat precisely and without flame a metallic (conductive) part without risk of deterioration of the surrounding non-conductive parts (glass, plastic, paint...)

In addition, the operator saves considerable time when using the tool.

### Specifications:

- frequency: 18-60kHz
- power: 3.7kVA
- power regulator: 10-100%
