

BODY REPAIR

Solutions

CHOOSE YOUR HEADLIGHT ADJUSTER PROPERLY.

Points to watch

Before choosing a headlight adjustment device, there are several questions to ask yourself:

- What type of vehicle am I likely to be working on? LV, LCV, HGV, motorcycle?
- How often do I use it?
- do I have a dedicated place in my workshop for this service, and does my location meet the requirements, or do I need to clear the area accordingly? (e.g. laying a rail if it's not flat).

The different types of light in an optical compartment:

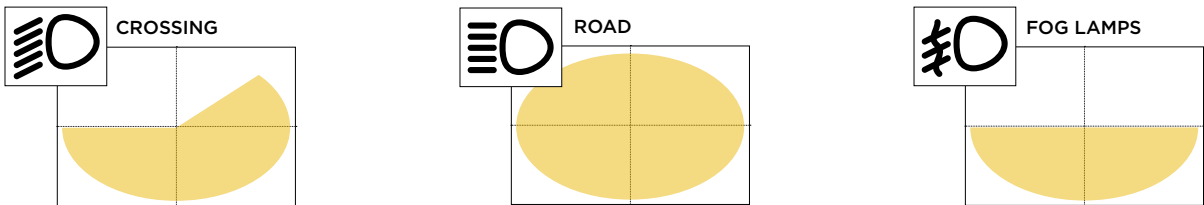

- halogen light
- xenon light
- LED light
- laser light
- "intelligent" light

LEARN MORE

MATRIX - DLA - ILS : Added segments

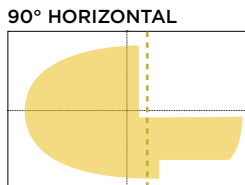

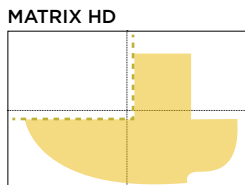

The evolution of headlights has led automobile manufacturers to create lighting modules with different construction characteristics. The projections established by current regulations remain unchanged (low, high and fog lights), but a fourth projection must be controlled depending on the vehicle manufacturer.

Adjustment: diagnostics takes over

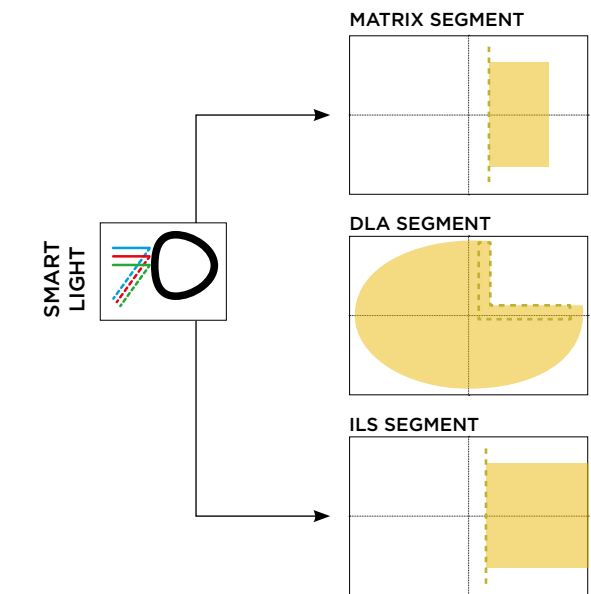

If segments have been added to the vehicle, the prerequisite for adjusting and checking the position is to connect to the control unit via diagnostics at the ODB socket and set the adjustment mode. the reference parameters for adjusting the segments to be added are defined by the car manufacturer and the vehicle being tested. any operation carried out on the phrases without connecting to diagnostics will be cancelled when the vehicle is started up.

Update 2020: new segments!

With the evolution of cars, and indeed of their headlamps, new segments have recently appeared, and our AC 3010 headlamp adjuster will enable you to adjust them.

Reminder: the headlamp needs to be updated annually. If you purchased your device before 2020, these new segments will be available with the update.

COMPARATIVE OVERVIEW

REF	AC 2005BL	AC 2013	AC 3010
Vehicle type			
Intensity of use			
Aligner	Miroir	Double laser	Double laser
Beam reading	Sight	Sight	Camera

Light type	Halogen, Xenon, Led	Halogen, Xenon, Led	Halogen, Xenon, Led, Matrix led, Laser
Screen type	Digital	Digital	5.7° color LCD touchscreen
Optional rail	No	Yes	Yes

HEADLIGHT ADJUSTMENT

STANDARD HEADLIGHT ADJUSTMENT DEVICE

AC 2005BL

Functions :

- 0-4% drawdown measurement and control
- lateral adjustment control $\pm 5\text{cm}/10\text{m}$
- light output measurement 0-150klux/1m, 0-240lux/25m
- intervention on Code, Full and Fog light beams from light sources (Xenon, Halogen, LED...)

Specifications:

- mirror-type aligner
- digital luxmeter
- aluminum column (removable) graduated from 20 to 150cm
- sliding adjustment mechanism
- metal case with adjustable inclination
- power supply: 9V battery (included)
- dimensions: L.712xW.580xH.1810mm

Polycarbonate lens

DUAL LASER HEADLIGHT ADJUSTMENT DEVICE

AC 2013

Functions :

- 0-4% drawdown measurement and control
- lateral adjustment control $\pm 5\text{cm}/10\text{m}$
- lighting power measurement 0-150klux/1m, 0-240lux/25m
- intervention on headlights (Xenon, Halogen, LED...), fog lights

Specifications:

- laser-type aligner (SA2037) compliant with EN 60825 standard
- digital luxmeter
- removable aluminum column graduated from 20 to 150cm
- sliding adjustment mechanism
- thermoplastic housing with adjustable inclination
- laser aligner power supply: 3 x 1.5V batteries (included)
- dimensions: L.712xW.580xH.1810mm
- UTAC NFR 63801 standard

Graduation

Glass lens

+ Precise laser adjustment to the optics

DUAL LASER/CAMERA HEADLIGHT ADJUSTER

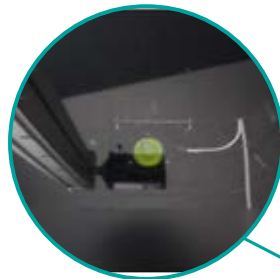

AC 3010

- automatic beam control and diagnostics: low beam, high beam and fog lamps, whatever the type of light source (laser, led, Matrix led, Xenon, Halogen, etc.) and type of management (ILS Intelligent Light System, AFS Adaptive Front lighting System, DLS Dynamic Light System, DLA Dynamic Light Assist)
- provides automatic camera-based control and measurement of the downward and lateral beam. It also measures lighting power.
- cross laser housing centering.
- UTAC NFR 63-801 compliant

+ Suitable for 100% of fire types

Printer

Specifications:

- measuring range: 0-6% (accuracy $\pm 0.1\%$)
- luminous intensity: 150kcd
- 360° rotating Aluminum column
- counterweight rise-and-fall
- 3-axis inclinometer electronically compensates for ground irregularities
- adjustable castors compensate for large differences in floor level
- case height sensor
- 5.7" color LCD touchscreen
- integrated printer: registration no./date/test result
- 12V rechargeable battery
- automatic sleep mode
- quick and easy software updates (via USB key)
- connections: RS232
- communication protocols: Net1, Net2
- dimensions: L.695xW.660xH.1780mm

RATCHET WINDSHIELD CUTTER

OC 6498

Accessory for OC 2900/OC 4500/OC 0600/OC 0200/OP 0500/
OP 0714/OP 5060/OC 2100/OC 3100/OC 3401/OC 1100

Thanks to its nylon thread, this single-suction pump kit enables windscreens to be removed without damaging the seals, so there's no need to dismantle them. The seal is cut by pulling a wire (or cable) activated by a ratchet system. Thanks to its compact size, this suction pad can be used on windscreens, rear windows and rear quarter windows. Easy to use, it enables rapid intervention (a few minutes) by a single operator, with no physical effort required. This tool has been approved by a large number of vehicle manufacturers.

+ 1 single operator and effortless cutting

- Specifications:**
- universal: compatible with nylon and steel wire (all types: braided, square and triangular)
 - 200kg pulling capacity (compared to 100kg for steel wire)
 - up to 8 cuts before changing nylon wire

- Contents:**
- single-suction ratchet cable-pulling system
 - 25m nylon wire reel
 - OC4100: windshield grommet
 - safety glasses

+ Ultra-stable hold even on uneven floors.

- Features :
- Integrated pneumatic venturi system for rapid vacuuming.
 - Large, high-strength suction pad seal, effective on uneven floors.
 - Reinforced traction ring for all types of bodywork operations.
 - Robust steel construction.
 - Perfectly flat base for optimum grip.
 - Fully compatible with OC 0800 straightening column.
 - Easy to use: quick connection to compressed air network.

2 WARRANTY

POINT-PULL BOX WITH INERTIA WEIGHT

OC 0214

NEW

This dent removal kit enables the user to repair bodywork that has been dented or dented without even repainting the component.
The process consists of gluing plastic pellets to the body using the gun and glue specially designed for bodywork, and connecting the inertia weight or pulling pliers to bring back the painted sheet metal without damaging it. The pad is simply removed with a surface-cleaning solvent (not supplied) and the nylon chisel.

TN

EXPERT DENT REMOVAL LAMP WITH BATTERY AND CHARGER

OE 1240 397 €HT

The lamp is easily attached to the bodywork using its pneumatic vacuum suction cup, or via its integrated magnet, for rapid installation on any type of surface.
Mounted on a flexible 40 cm ball-and-socket joint, it can be freely oriented to precisely adjust the luminous flux to the area to be treated.

It features 1 to 3 LED strips that can be activated independently, enabling lighting to be modulated as required. Light intensity and color temperature are adjustable to optimize reading of even the finest impacts and deformations.

Supplied with an interchangeable ridged reflector, it perfectly highlights sheet irregularities for fast, precise and controlled dent removal.

Contents:

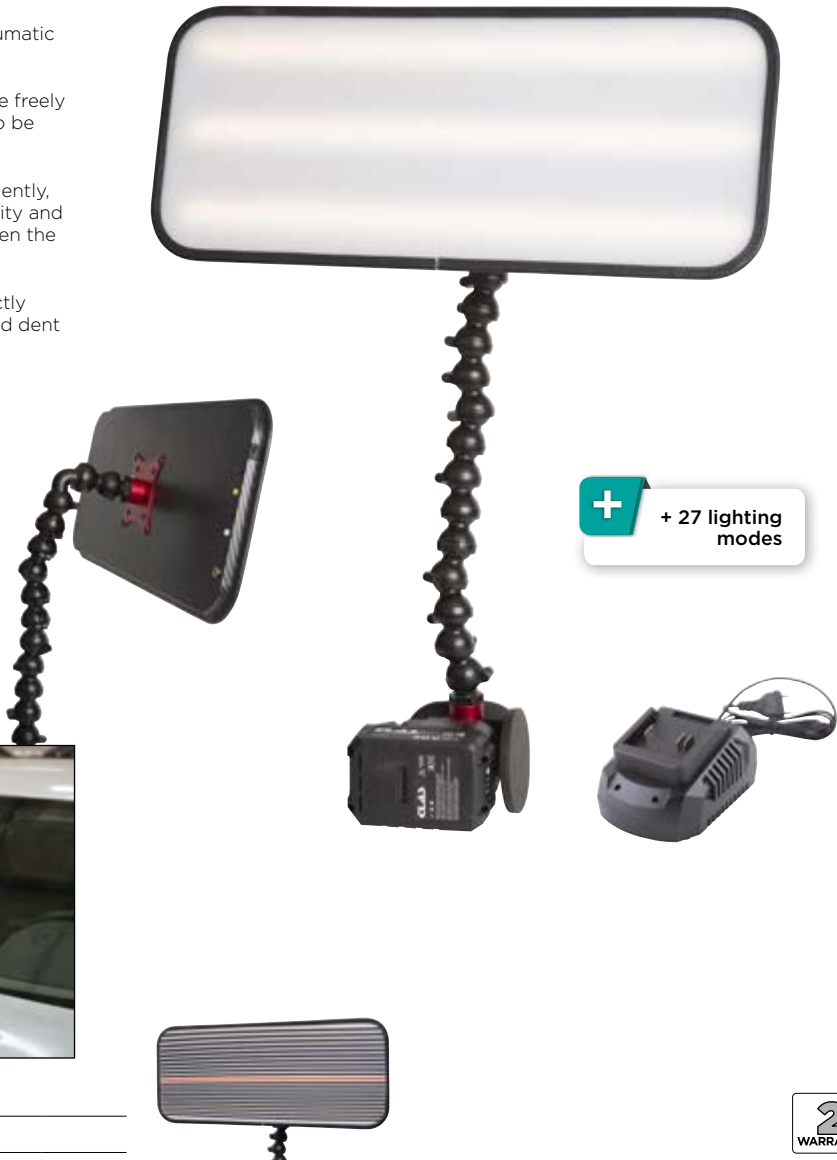

- OE1230: dent removal lamp
- PW 9112: battery charger
- PW 9004 : 20V 4Ah battery

Specifications:

- Reflector size: 22x52cm
- 3 independently controllable LED ribbons, adjustable in intensity and color

SA 1266 RIBBED POLYCARBONATE FOR OE 1230 DENT REMOVAL LAMP

+ 27 lighting modes

TN

LED DENT REMOVAL LAMP

OE 1231 79 €HT

This LED inspection light is easy to attach to any bodywork, thanks to its versatile system: a sturdy suction cup or an integrated magnet enable fast, secure installation, even on vertical surfaces.

Mounted on a flexible 55 cm ball-and-socket joint, it offers total freedom of movement. You can precisely adjust the light output to illuminate each work area effortlessly. Its high-performance LED provides neutral white light (≈ 455-457 nm) with a wide illumination angle (up to 140°), guaranteeing excellent visibility.

The lamp is supplied with a USB power cable, convenient for use with an external battery, mains charger or vehicle USB port.

Specifications:

- Dimensions: 19X36cm

TN

PAINTLESS DENT REMOVAL 7 DRAWERS ROLLER CABINET 87 PIECES

EG 8889

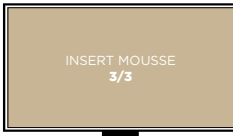

Paintless dent removal by hot or cold gluing.
This technique is used when the paintwork is not damaged.
Several solutions are available :
• point-by-point pulling on the glued head using precision pliers or inertia weights
• sheet shrinkage by spreading glued fastening points with mechanical spreaders acting on pre-glued support points.

Contents:
• 1 x 7-drawer trolley EG0087
• 3 drawers with foam inserts
