

GENERAL TOOLS *Solutions*

KELVIN

It is the color temperature scale, which describes the way certain colors appear to us visually. We refer to warm or cool white depending on the number of Kelvin. Lamps between 5000 and 7000K are those that are close to daylight.

WHAT IS "LUMEN"?

It is the unit of luminous flow measurement, meaning the power of your lighting. One Watt is equivalent to +/- 80 Lumens (depending on the type of LED used).

PROTECTION RATINGS

IP : protection rating against liquids and dust. 1st number: from 0 to 6 indicates protection against solid bodies 2nd number: from 0 to 8 indicates protection against liquids The higher the number, the more the product is liquid tight and/or dust-tight.

IK : protection rating against shocks and impacts. This number goes from 01 to 10. The higher the index, the more resistant the product is. Going from 06 to 08 means a product 5x more resistant.

HGV INDUCTION HEATER

OE 0900

This tool heats a part at a precise point, making it easy to release screws, nuts, bolts, connecting rods, hubs (even rusty ones), lambda probes, ball bearings... It also makes it easy to remove stickers, glued door strips or truck wheel nuts.

Increased safety
Time saving

It's a real alternative to blowtorches or flame torches: its induction system enables precise, flameless heating of a (conductive) metal part, with no risk of damaging neighbouring non-conductive parts (glass, plastic, paint, etc.). What's more, the operator saves considerable time when setting up the tool.

LIFTING TABLE 1200kg FOR EV BATTERY AND HEAVY ORGANS

OH 1201

This table is specially designed for the precise removal and re-installation of heavy components up to 1.2T max load (electric vehicle battery and/or powertrain). Versatile, it can be adapted to all your needs thanks to its numerous settings and optional supports. A hydropneumatic control system enables effortless, fast and precise height adjustment. Descent is secured by a "deadman" function requiring 2 simultaneous actions by the operator. In the event of a problem involving the operator, this function is automatically stopped. The platform is fully mobile in relation to its frame, and features 96 M10x1.5 drilled and tapped points, evenly distributed to accommodate various accessories (available on request).

- Specifications:**
- length: 1860mm
 - width: 790mm
 - minimum platform height: 710mm
 - maximum tray height: 2090mm
 - minimum tray length: 1380mm
 - maximum platter length: 1580mm
 - rise time: +/-50s
 - lowering time: +/-30s
 - 4 swivel castors with brakes: 130mm
 - 4 handles positioned around the table for optimum ease of use when adjusting the load at rest.

- Adjustments:
- the table top unfolds into three lockable positions for a maximum surface area of 1560mmx730mm. It is tapped M10x1.5 to accommodate various accessories (available on request).
 - the table's flatness can be adjusted at 2 points for high positioning accuracy
 - the table top can be moved in translation and pivoted for greater precision when repositioning elements.
