1/2" Impact Wrench Set, 1600 Nm, 2 + 1 Free

OP 1622BLX3

B.LINE
BUDGET SOLUTION

The OP 1622BL is the ideal power tool for workshops looking for an excellent power/price ratio. This 1/2" impact wrench from the B-Line delivers a torque of 1600Nm, offering the capacity needed for routine and intensive loosening work without impacting the budget balance of your equipment.

Specifications:

- loosening torque: 1600Nm
- max. tightening torque: 880Nm
- speed: 8,500 rpm
- connection: 1/4"
- recommended hose diameter: 3/8"
- - 10mm
- supply pressure: 6.3bar
- consumption: 184l/min
- length: 159mm
- net weight: 1.8kg
- supplied with fitting

Features:

- 4-position variator
- handle exhaust system
- one-hand reverser

CLAS

Smoke leak detector

AC 0410

Thanks to its compact size, this machine is easy to transport, enabling it to be used throughout the workshop.

Its integrated compressor eliminates the need for an air supply.

Compatible with the majority of the vehicle fleet, and connected to the battery terminals, it enables rapid diagnosis of the vehicle's closed circuits (turbo, exhaust, cooling, etc.).

To detect micro-leaks in :

- vacuum
- exhaust
- turbo insulation
- oil pan
- intake
- cooling

This device drastically reduces leak detection time by releasing opaque, fine smoke that can be instantly identified even on the smallest leaks. No risk to user or vehicle.

Contents:

- main unit
- accessory case
- adapter cone
- power cable
- smoke distribution pipe
- funnel
- universal adjustable intake bag
- bag replacement rubber
- test fluid (250 ml)
- oil filler cap adapter (for most BMW vehicles)
- smoke diffuser
- EVAP system accessory kit (fuel vapour recovery system)
- set of blanking plugs

Why choose this kit?

- Controlled bending without crushing
- Preserves the tube's inner diameter to ensure optimal fluid flow.
- Direct on-vehicle use
- Ideal for quick repairs without complete disassembly.
- Compact and easy-to-handle design
- Easy access in tight spaces.
- Compatible with standard materials
- Suitable for copper and cupronickel tubing.
- Workshop productivity: fewer reworks and adjustments – immediate time savings.

Cooling system filling/draining device

AC 1020

This mobile device can drain, check for leaks, clean, create a vacuum to purge the cooling circuit and refill it, thanks to its venturi system coupled with a pressure gauge. Ensures environmentally-friendly operation, since virtually all the used coolant is recovered, enabling the user to dismantle any Engine component without draining coolant.

Specifications:

- 2 independent 15-liter tanks for storing polluted liquid and new liquid
- 2 manometers for tank control
- connection to expansion vessel via conical adapter
- 3 dip tubes of different lengths
- 4 swivel wheels
- dimensions: L.430xW.610xH.1350mm
- weight: 43kg

Functions:

- used liquid extraction
- vacuum leak test
- new liquid filling
- used liquid tank draining
- new liquid tank draining

CO2 detection kit

TN

AC 3300

1- Replace the radiator or expansion tank cap with a Plexiglas tube containing a specified dose of tracer fluid (hot engine).

2- Place the bulb on the tube and squeeze repeatedly.

The gases in the cooling circuit mix with the tracer fluid.

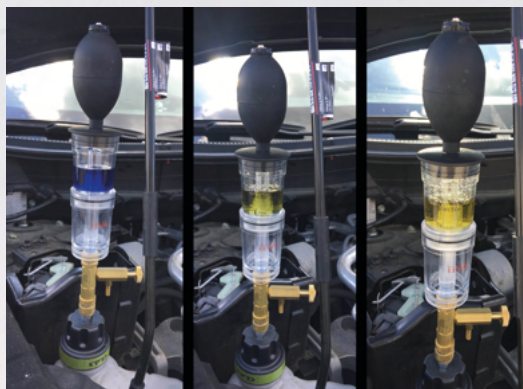

The blue test liquid changes color (turns yellow) if there's an internal combustion leak and therefore the presence of CO2 gas in the coolant.

Problem: cylinder head gasket.

- checks radiator for combustion gases.
- test fluid changes color if a leak is detected.
- quick identification of a faulty cylinder head gasket.
